The State allows a property owner to pull a permit to construct his own home with certain limitations: These limitations are explained in the "Disclosure Statement" mandated by the State of South Carolina.

A residential plan review is required for all residential construction projects. This process allows us sufficient time to review construction documents against current codes and verify proper licensing of the contractors. This review process will be completed, and the contractor notified of the results, as soon as possible but should be completed in five (5) business days after completed submittal.
